

FOREWORD	1	2.3.1 Darcy's Law	31
PART I: INTRODUCTION	5	2.4 ROCK-FORMING AQUIFERS	34
CHAPTER 1 INTRODUCTION	7	2.4.1 Porosity	36
1.1 BACKGROUND AND HISTORICAL PERSPECTIVES	8	2.5 GROUNDWATER SYSTEMS	37
1.1.1 A review of the literature	8	2.5.1 Aquifers	39
1.1.2 Historical progression on groundwater research	9	2.5.1.1 Aquifer systems	41
1.2 GROUNDWATER RESOURCES IN THE WORLD AND CANADA	12	2.5.2 Aquitard characteristics	43
1.2.1 Groundwater in the hydrologic cycle	12	2.5.3 Groundwater storage in aquifers	43
1.2.2 Water quantities	13	2.6 PRINCIPLES OF REGIONAL GROUNDWATER FLOW ..	44
1.2.3 Water availability	14	2.6.1 Recharge	44
1.2.4 Water supply and use	15	2.6.2 Discharge	46
1.3 BOOK STRUCTURE AND OVERVIEW	17	2.6.3 Boundary conditions	46
1.3.1 Objectives of major parts and chapters	18	2.6.4 Issues of scale: Time and space	47
PART II: UNDERSTANDING GROUNDWATER	21	2.6.5 Gravity-driven groundwater flow	49
CHAPTER 2 GROUNDWATER BASICS	23	2.7 GROUNDWATER EXTRACTION AND WELLS	49
2.1 INTRODUCTION	24	2.8 INTERACTIONS WITH SURFACE WATER	53
2.2 WHAT IS GROUNDWATER?	25	2.8.1 Differences in flows between surface water and groundwater	54
2.2.1 Groundwater flow mechanisms	28	2.9 GROUNDWATER QUALITY (NATURAL AND CONTAMINATED)	54
2.2.2 How do groundwater aquifers differ from surface water watersheds?	29	2.9.1 Natural quality	54
2.3 NATURE OF PERMEABILITY	30	2.9.2 Quality standards	57
		2.9.3 Contaminated groundwater	59
		CHAPTER 3 AN APPROACH TO REGIONAL ASSESSMENTS OF GROUNDWATER	

CONTENTS

RESOURCES	63	4.1 INTRODUCTION	102
3.1 REGIONAL AQUIFER SYSTEMS: HIDDEN AND SIZEABLE! HOW DO WE ASSESS THEM?	64	4.2 WHAT IS GROUNDWATER RECHARGE?	103
3.2 INFORMATION MANAGEMENT—INTEGRATED DATABASES	68	4.3 RECHARGE, DISCHARGE AND GROUNDWATER FLOW	106
3.3 REGIONAL GEOLOGY AND BASIN HYDROSTRATIGRAPHY	70	4.4 HOW OLD IS THE GROUNDWATER?	107
3.3.1 Basin study	70	4.5 WHAT FACTORS CONTROL SHALLOW GROUNDWATER RECHARGE?	107
3.3.2 Conceptual geological models	71	4.5.1 Climate across Canada	108
3.3.3 Model testing and documentation	73	4.5.2 Evapotranspiration and potential recharge	109
3.4 GEOLOGICAL, GEOPHYSICAL, HYDROGEOLOGICAL AND HYDROGEOCHEMICAL SURVEYS	74	4.5.3 Physical and biological controls on infiltration ...	112
3.4.1 Geological surveys	75	4.5.4 The shallow recharge process	115
3.4.2 Geophysical surveys	76	4.6 AQUIFER RESPONSES TO INFILTRATION AND RECHARGE	117
3.4.3 Hydrogeological surveys	80	4.7 METHODS FOR ESTIMATING RECHARGE	122
3.4.4 Hydrogeochemical surveys	84	4.7.1 Physical methods	124
3.5 PARAMETER ESTIMATION, INTEGRATION AND EXTRAPOLATION OF DATA	86	4.7.2 Chemical methods	126
3.6 THREE-DIMENSIONAL MAPPING AND NUMERICAL MODELLING	89	4.7.3 Modelling approaches	128
3.7 QUANTIFICATION OF UNCERTAINTIES IN HYDROGEOLOGICAL PARAMETER ESTIMATION	94	4.8 REGIONAL VARIATIONS IN RECHARGE	128
3.8. EXPECTED OUTPUTS AND SUMMARY	97	4.8.1 Cordillera	128
PART III: THEMATIC OVERVIEWS	99	4.8.2 Plains	131
CHAPTER 4 RECHARGE AND CLIMATE	101	4.8.3 Precambrian Shield	132
		4.8.4 Hudson Bay Lowlands	132
		4.8.5 Southern Ontario Lowlands	132
		4.8.6 St. Lawrence Lowlands	132
		4.8.7 Appalachians	133
		4.8.8 Maritimes Basin	134

4.8.9 Northern Canada	134	5.2.5 Interactions with different SW systems	162
4.9 CLIMATE VARIABILITY AND CLIMATE CHANGE	134	5.2.5.1 Streams and rivers	162
4.9.1 Climate variability and recharge	135	5.2.5.2 Lakes and ponds	164
4.9.2 Climate change impacts on recharge	138	5.2.5.3 Reservoirs (impoundments)	167
4.10 CONCLUSIONS	139	5.2.5.4 Wetlands	167
BOX 4-1 DIRECT AND INDIRECT GROUNDWATER		5.2.5.5 Oceans and coastal areas	169
RECHARGE AND IMPACTS OF FUTURE		5.2.6 Interactions with different GW systems	170
CLIMATE CHANGE	140	5.2.6.1 Porous media flow systems	171
BOX 4-2 DEPRESSION-FOCUSED GROUNDWATER		5.2.6.2 Fractured media flow systems	172
RECHARGE	144	5.2.6.3 Karst terrain flow systems	172
BOX 4-3 MODELLING GROUNDWATER RECHARGE AND		5.2.7 Natural and human influences	173
WATER BUDGETS	146	5.2.8 Spatial and temporal scales	174
		5.2.9 Methods of investigation	175
CHAPTER 5 GROUNDWATER–SURFACE WATER		5.3 GW-SW INTERACTIONS IN CANADA	175
INTERACTIONS IN CANADA	151	5.3.1 Research and data	175
5.1 INTRODUCTION	152	5.3.2 Conceptual models in Canadian settings	177
5.2 KEY CONCEPTS OF GROUNDWATER–SURFACE WATER		5.3.2.1 Permafrost	177
INTERACTIONS	152	5.3.2.2 Permeable glacial sediment	180
5.2.1 GW-SW interactions, an element of the		5.3.2.3 Mountains	182
hydrological cycle	153	5.3.3 Summary of GW-SW interactions in Canada	183
5.2.2 Importance of GW-SW interactions	153	5.4 CONCLUSIONS AND FUTURE CHALLENGES	184
5.2.3 Hydraulic connection	156	ACKNOWLEDGEMENTS	185
5.2.4 Types of GW-SW interactions	157		
5.2.4.1 Groundwater discharge to surface water	159	CHAPTER 6 SUSTAINABILITY AND	
5.2.4.2 Surface water recharge to groundwater	159	VULNERABILITY OF GROUNDWATER	187
5.2.4.3 GW-SW exchange	161	6.1 INTRODUCTION	188

6.2 GROUNDWATER DEVELOPMENT

AND SUSTAINABILITY	189
6.2.1 How much water is available?	189
6.2.2 What is sustainability?	191
6.2.3 Groundwater development: The risk or consequence factor	195
6.2.4 Determining groundwater quantity sustainability	201
6.2.4.1 Well sustainability	201
6.2.4.2 Aquifer sustainability	204
6.2.5 Climate change impacts on groundwater sustainability	205
6.3 GROUNDWATER VULNERABILITY AND WATER QUALITY RISK ASSESSMENTS	206
6.3.1 Assessing aquifer vulnerability	207
6.3.2 AVI	208
6.3.3 DRASTIC	209
6.3.4 Comparison of vulnerability mapping methods ..	211
6.3.5 Wellhead protection	212
6.3.6 Integrating land use and groundwater into decision making	215
6.4 PLANNING FOR THE FUTURE	217
6.4.1 Challenges in Canada	218
6.4.2 Recommendations	219
BOX 6-1 GROUNDWATER SUSTAINABILITY IN THE ST. LAWRENCE LOWLANDS	220

BOX 6-2 AQUIFER VULNERABILITY IN FRACTURED

ROCK AQUIFERS	224

BOX 6-4 DELINEATING WELLHEAD PROTECTION AREAS— COMPARATIVE STUDY OF METHODS	231

CHAPTER 7 GROUNDWATER AS AN ENERGY SOURCE.....

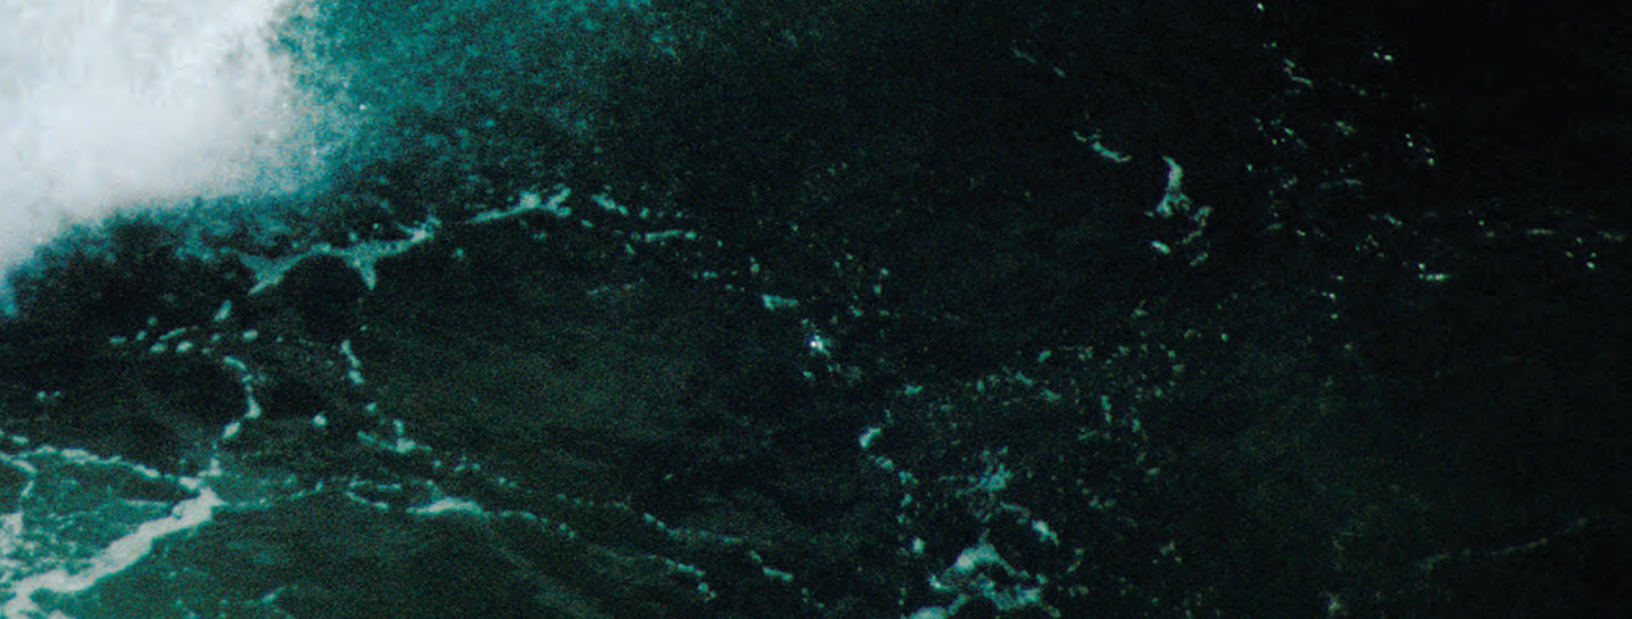

7.1 INTRODUCTION	238
7.2 DISTRIBUTION OF THERMAL WATERS	240
7.3 GEOTHERMAL RESOURCE POTENTIAL	242
7.3.1. Direct generation of electricity	243
7.3.2. Moderate- to high-temperature resources	244
7.3.3. Low-temperature resources	248
7.4 THERMAL ENERGY STORAGE (TES)	250
7.4.1. Aquifer Thermal Energy Storage (ATES)	251
7.4.2. Borehole Thermal Energy Storage (BTES)	256
7.4.3. Cavern Thermal Energy Storage (CTES)	257
7.4.4 Other considerations	260
7.5 CONCLUSIONS.....	261

PART IV: OVERVIEWS OF HYDROGEOLOGICAL REGIONS.....

CHAPTER 8 HYDROGEOLOGICAL REGIONS OF CANADA	265
--	------------

8.1 INTRODUCTION	266	8.3.7.1 Hydrogeology of Appalachian Region.....	292
8.1.1 Previous work and principal concepts	266	8.3.8 Maritimes Basin	293
8.2 DEFINITION OF HYDROGEOLOGICAL REGIONS	266	8.3.8.1 Hydrogeology of Maritimes Basin	294
8.2.1 The hydrogeological regions map as a framework for analysis	268	8.3.9 Permafrost	297
8.2.1.1 Land cover	269	8.3.9.1 Hydrogeology of Permafrost	297
8.2.1.2 Evapotranspiration	269	8.4 SUMMARY	298
8.2.1.3 Baseflow and groundwater storage	269	ACKNOWLEDGEMENTS	299
8.2.1.4 Permeability and water table	271	CHAPTER 9 CORDILLERAN	
8.2.1.5 Effects of glaciation	272	HYDROGEOLOGICAL REGION	301
8.2.2 Vignettes	273	9.1 INTRODUCTION	302
8.3 HYDROGEOLOGICAL REGIONS OF CANADA	275	9.1.1 Previous Studies	302
8.3.1 Cordillera	275	9.2 PHYSICAL SETTING AND CLIMATE	303
8.3.1.1 Hydrogeology of Cordillera	275	9.3 GEOLOGIC SETTING	304
8.3.2 Plains (Western Canadian Sedimentary Basin)	276	9.3.1 Surficial geology	304
8.3.2.1 Hydrogeology of Plains	278	9.3.2 Bedrock geology	309
8.3.3 Canadian Shield	280	9.4 MAJOR AQUIFER TYPES AND THEIR GENERAL	
8.3.3.1 Hydrogeology of Canadian Shield	281	CHARACTERISTICS	310
8.3.4 Hudson Bay Lowlands	283	9.4.1 Predominantly unconfined aquifers of fluvial or glaciofluvial origin along river or stream valleys (Type 1)	312
8.3.4.1 Hydrogeology of Hudson Bay Lowlands	284	9.4.1.1 Occurrence, identification and size characteristics	313
8.3.5 Southern Ontario Lowlands	284	9.4.1.2 Productivity characteristics and importance as a water supply	314
8.3.5.1 Hydrogeology of Southern Ontario Lowland	286	9.4.1.3 Aquifer vulnerability and water	
8.3.6 St. Lawrence (Platform) Lowlands	288		
8.3.6.1 Hydrogeology of St. Lawrence Lowlands	290		
8.3.7 Appalachian Region	291		

quality characteristics	315	9.4.5 Sedimentary bedrock aquifers (Type 5)	322
9.4.1.4 Profile: Aquifer at Grand Forks	316	9.4.5.1 Occurrence, identification and size characteristics	322
9.4.2 Predominantly unconfined deltaic sand and gravel aquifers (Type 2)	317	9.4.5.2 Productivity characteristics and importance as a water supply	324
9.4.2.1 Occurrence, identification and size characteristics	317	9.4.5.3 Aquifer vulnerability and water quality characteristics	325
9.4.2.2 Productivity characteristics and importance as a water supply	317	9.4.5.4 Profile: Fractured sedimentary aquifers of the Gulf Islands	326
9.4.2.3 Aquifer vulnerability and water quality characteristics	318	9.4.6 Crystalline bedrock aquifers (Type 6)	327
9.4.3 Alluvial, colluvial sand and gravel aquifers (Type 3)	318	9.4.6.1 Occurrence, identification and size characteristics	327
9.4.3.1 Occurrence, identification and size characteristics	318	9.4.6.2 Productivity characteristics and importance as a water supply	328
9.4.3.2 Productivity characteristics and importance as a water supply	319	9.4.6.3 Aquifer vulnerability and water quality characteristics	329
9.4.3.3 Aquifer vulnerability and water quality characteristics	320	9.5 GROUNDWATER USE IN THE REGION	331
9.4.4 Sand and gravel aquifers of glacial or preglacial origin (Type 4)	320	9.6 WATER STORED IN DEVELOPED AQUIFERS WITHIN THE REGION	331
9.4.4.1 Occurrence, identification and size characteristics	321	9.7 WATER QUALITY	333
9.4.4.2 Productivity characteristics and importance as a water supply	321	9.7.1 General groundwater quality in the Region	334
9.4.4.3 Aquifer vulnerability and water quality characteristics	322	9.7.2 Common water quality concerns in the Region	335
		9.7.2.1 Nitrate	336
		9.7.2.2 Arsenic	337

9.7.2.3 Fluoride and boron	338	10.2.6 Groundwater use in the Plains Region	367
9.7.2.4 Salty water (sodium and chloride)	338	10.3 MAJOR AQUIFER TYPES AND PROPERTIES	369
9.7.2.5 Bacteria	339	10.3.1 Bedrock aquifers	371
9.7.2.6 Other parameters	339	10.3.1.1 Carbonate aquifers	371
9.8 GROUNDWATER MONITORING IN THE CORDILLERAN		10.3.1.1.1 Carbonate Aquifer System of Manitoba	371
HYDROGEOLOGICAL REGION	341	10.3.1.2 Sandstone aquifers	379
9.9 CONCLUSIONS	343	10.3.1.2.1 Winnipeg Aquifer	379

CHAPTER 11 PRECAMBRIAN SHIELD	415
11.1 INTRODUCTION	416
11.1.1 Physiography	416
11.1.2 Population	416
11.1.3 Climate and hydrography	416
11.1.4 Groundwater and human activities	416
11.2 GEOLOGY	417
11.2.1 Bedrock geological provinces	417
11.2.2 Quaternary deposits	419
11.3 HYDROGEOLOGICAL CONTEXTS	419
11.3.1 Context 1: Greenstone belts, metasedimentary, gneissic and intrusive crystalline rock (most of the Shield)	421
11.3.2 Context 2: Same as context 1, with a platform cover of Proterozoic or Paleozoic age	422
11.3.3 Context 3: Quaternary aquifers of granular material	423
11.4 CURRENT KNOWLEDGE ON GROUNDWATER IN THE CANADIAN SHIELD	425
11.4.1 Hydrology and climate	425
11.4.2 Groundwater geochemistry	426
11.4.2.1 Overburden groundwater geochemistry	426
11.4.2.2 Bedrock groundwater geochemistry	427
11.4.3 Isotopes in groundwater	428
11.4.3.1 Isotopes in groundwater from surficial aquifers	431
11.4.3.2 Isotopes in groundwater from crystalline aquifers	433
11.4.3.3 Summary on isotopes studies	435
11.4.4 Groundwater and mining	435
11.4.4.1 Groundwater as a mineral exploration tool	435
11.4.4.2 Groundwater withdrawal for mining	436
11.4.4.3 Coupling of hydrogeological and geomechanical processes	436
11.4.4.4 Contamination from mine tailings	436
11.4.5 Sparse data on well yield, hydraulic properties	437
11.5 CASE STUDIES AND SPECIFIC ISSUES	439
11.5.1 Groundwater vulnerability	439
11.5.2 Contamination from natural sources	439
11.5.3 Man-made contamination	439
11.5.4 Comparisons with other Shield areas in the world	440
11.6 CONCLUSIONS	440
 CHAPTER 12 SOUTHERN ONTARIO HYDROGEOLOGICAL REGION	 443
12.1 INTRODUCTION	444
12.1.1 Setting	445
12.1.2 Climate	446
12.1.3 Physiography	446
12.1.4 Geology	448
12.1.5 Key groundwater information sources	450

12.1.5.1 Province-wide reports	450	a Nith River watershed	471
12.1.5.2 Municipal groundwater studies and Source Protection assessment reports	452	12.3.1.2 Groundwater occurrence and regional aquifers	474
12.1.5.3 Groundwater monitoring, databases, and mapping	453	12.3.1.3 Groundwater recharge, flow, and discharge	474
12.1.5.4 Accessible groundwater information	454	12.3.1.4 Climate stress	475
12.2 HYDROGEOLOGICAL FRAMEWORK	454	12.3.2 Groundwater quality	477
12.2.1 Bedrock topography and overlying sediment thickness	455	12.3.2.1 Ontario drinking water objectives	477
12.2.1.1 Laurentian buried valley	455	12.3.2.2 Groundwater quality monitoring and related studies	478
12.2.2 Hydrogeological settings	458	12.3.2.2.1 Provincial Groundwater Monitoring Network	478
12.2.2.1 Sediment hydrogeological setting	459	12.3.2.2.2 Water well records	478
12.2.2.2 Sediment setting case studies	460	12.3.2.2.3 Ambient chemical characterization of regional aquifers	478
12.2.2.3 Sediment-bedrock interface hydrogeological setting	460	12.3.2.2.4 Ambient groundwater geochemistry data for southwestern Ontario, 2007–2010	480
12.2.2.4 Exposed, thin sediment-covered bedrock hydrogeological setting	461	12.3.2.2.5 Ontario farm groundwater quality survey ..	480
12.2.2.5 Deep bedrock hydrogeological setting	463	12.3.2.2.6 Road salt management	481
12.2.2.6 Summary of hydrogeological settings	465	12.3.3 Groundwater use	483
12.2.3 Oak Ridges Moraine: Thick sediment case and the need for high-quality data	466	12.3.3.1 Patterns and trends	484
12.3 GROUNDWATER RESOURCES	470	12.3.4 Understanding groundwater systems within the Grand River watershed	485
12.3.1 Groundwater quantity and availability	470	12.3.4.1 The quality of groundwater within the	
12.3.1.1 Water availability in a typical setting—

CHAPTER 16 GROUNDWATER MANAGEMENT IN CANADA

16.1 INTRODUCTION	640
16.2 GROUNDWATER USE IN CANADA	640
16.3 EXISTING LEGISLATIVE FRAMEWORK	644
16.4 MANAGEMENT VERSUS GOVERNANCE	645
16.5 GROUNDWATER MANAGEMENT ACTIVITIES	647
16.5.1 Groundwater supply allocation in the provinces and territories	647
16.5.1.1 Approaches to groundwater allocation	649
16.5.1.2 Exemptions and terms of licences and permits	649
16.5.1.3 Changing values and water use	649
16.5.2 Environmental and groundwater quality protection	650
16.5.2.1 Waste discharges and contaminated sites	650
16.5.2.2 Protection of drinking water sources	650

16.5.2.3 Land use and watershed planning	651
16.5.3 Best management practices and standards	652
16.5.4 Groundwater monitoring networks	652
16.5.5 Inter-agency cooperation	653

16.6 ISSUES IN GROUNDWATER MANAGEMENT

IN CANADA	655
16.6.1 Quantity issues	655
16.6.1.1 Aquifer depletion	655
16.6.1.2 Oil sands development	656
16.6.1.3 Transboundary aquifers	657
16.6.2 Quality issues	657
16.6.2.1 Nitrate contamination	657
16.6.2.3 Other issues	659
16.6.3.1 Aboriginal and treaty rights to water	659
16.6.3.2 Effects of climate change	659
16.6.3.3 Limited place-based knowledge of the resource	660

16.7 CONCLUSIONS AND RECOMMENDATIONS	662
